-
- The diagram illustrates the required clearances and components for a gas meter installation. The meter is mounted on concrete blocks, with a minimum clearance of 8" from the finished grade. The meter is labeled "METER 505".
- Clearances:**
- Minimum 36" clearance from the meter to the left and right electric panels.
 - Minimum 20' ± 2" clearance from the meter to the non-operable window above.
 - Minimum 12" clearance from the meter to the plumbing fixture on the left.
 - Minimum 12" clearance from the meter to the plumbing fixture on the right.
 - Minimum 37" ± 2" clearance from the meter to the finished grade.
- Components and Labels:**
- OPERABLE WINDOW (top left and right)
 - NON OPERABLE (SHOW) WINDOW (top center)
 - EXEMPT FROM CLEARANCE REQUIREMENTS (top center)
 - ELECTRIC PANEL (left and right)
 - CATV TELCOM (left and right)
 - ELECTRICAL OUTLET (left and right)
 - VENT (left and right)
 - REGULATOR
 - FILTER
 - SHUT OFF VALVE (left and right)
 - PLUMBING FIXTURE (left and right)
 - GAS SERVICE RISER
 - FINISHED GRADE
 - CONCRETE BLOCKS - SUPPLIED BY LBGO
